EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

The application has been amended as follows:

In the new paragraph added by Applicant's amendment of 9-10-03 please insert the phrase "now U.S. Pat. 6,692,623" after the phrase "Application No.10/107,363," in order to update the status of the application in the paragraph.

The following is an examiner's statement of reasons for allowance:

Claim 11 is allowable over the prior art of record because the prior art of record does not teach measuring a thickness of a film formed by the plasma at a plurality of points in the vicinity of the substrate, wherein the flowing direction of the coil current is reversed when a difference between film thickness values thus measured exceeds a predetermined value.

Claim 12 is allowable over the prior art of record because the prior art of record does not teach measuring ion currents at a plurality of points in the vicinity of the substrate, wherein the flowing direction of the coil current is reversed when a difference between current values thus measured exceeds a predetermined value.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably
